Dacast Integration (livestream Source)

Description:
Implement Dacast connection flow & player usage.

Overview:
Dacast integration was completed through the use of the generated iFrame from the Dacast service, then placing it into the code

iFrame code snippet:

```
    <section className="aspect-video w-full overflow-hidden rounded-2xl bg-black shadow-xl">
  <iframe
    id="2a62418a-b0e3-1351-e662-d96ca5de3a6f-live-d376f6da-e93c-47e2-93ca-0acff912480e"
    src="https://iframe.dacast.com/live/80cea297-81e0-24ec-924b-772c26b87f56/a2edb7a8-c226-4478-861f-539a00109990"
    className="w-full h-full"
    frameBorder="0"
    scrolling="no"
    allow="autoplay; encrypted-media"
    allowFullScreen
  ></iframe>
</section>
```

Livestream implementation within local development site below
