

Task # 142

Subscription status check

For this task I am going to create a skeleton table that checks the users status and user id that they have created.

Here is the table I have created and it needs to be tested. My next goal is to setup a managed mySql server to run this on and connect it to the backend

-- Users table

```
CREATE TABLE users (  
  user_id INT AUTO_INCREMENT PRIMARY KEY,  
  email VARCHAR(255) UNIQUE NOT NULL,  
  username VARCHAR(100) UNIQUE NOT NULL,  
  password_hash VARCHAR(255) NOT NULL,  
  first_name VARCHAR(100),  
  last_name VARCHAR(100),  
  subscription_tier ENUM('free', 'basic', 'premium') DEFAULT 'free',  
  created_at TIMESTAMP DEFAULT CURRENT_TIMESTAMP,  
  last_login TIMESTAMP NULL,  
  INDEX idx_email (email),  
  INDEX idx_username (username)  
);
```
